

PRESS RELEASE

Würth Industrie Service at the Fastener Fair Global 2025 in Stuttgart: Fasteners by specialists

Bad Mergentheim/Main-Tauber region. Because connection technology can never have downtimes: From 25th to 27th March 2025, the 10th international trade fair for fastener and fixing industry – Fastener Fair Global – will open its doors in Stuttgart. International exhibitors, including manufacturers, wholesalers, distributors and suppliers of fastener and fixing technology for industry, construction and production, will present the latest solutions, and will showcase the driving force behind the industry. Würth Industrie Service GmbH & Co. KG will also be present at booth 620 in hall 1 and will present the comprehensive solutions for supply of production and operating material along with a product range of more than 1,400,000 items.

Screws, nuts and washers – seemingly insignificant and yet extremely valuable: Fasteners have proven to be an important control factor in day-to-day operations for ensuring safe and trouble-free manufacturing. C-Parts have a big impact on procurement due to their irregular requirement, low unit costs and wide variety of items. Their shortage can bring the entire production to a standstill. As a holistic partner, Würth Industrie Service ensures that C-Parts are always available to its customers exactly where and when they are needed. True to the motto: “Fasteners. With certainty.” And in combination with customised procurement and logistics concepts as well. At the trade fair booth at this year’s Fastener Fair Global, the visitors will be able to explore, experience and try out a range of solutions: from RFID Kanban for fully automated replenishment of small parts for production, ORSY[®]mat storage and vending machines for auxiliary and operating materials or even autonomous robotic solutions with competent partners. Besides, the company will present a comprehensive overview of its specialised C-Parts spectrum with more than 1,400,000 items used for industrial production as well as for maintenance and servicing: Visitors will get the opportunity to explore standard parts, norm parts, special and drawing parts as well as auxiliary and operating materials live at the event.

Material supply up to the workstation: ORSY[®]mat mobil

How about a mobile vending machine that provides the required material directly to the workstation? A robot that brings the vending machine wherever it is required? At this year’s Fastener Fair Global 2025, Würth Industrie Service will

demonstrate how this will soon be possible at booth 620 in hall 1. The ORSY[®]mat vending machine is making material supply to the workstation a reality with the GESSbot Gb350, the autonomous mobile robot (AMR) that automates the internal transports in a fast and cost-efficient way. The special solution, developed in cooperation with W. Gessmann GmbH, aims to optimise the decentralised material dispensing, provide relief to the employees and achieve efficiency, flexibility and security at the same time. Thanks to the special sensors that map the surroundings, the robot follows defined routes, goes up to workstations and filling stations and can identify obstacles immediately. The mobile GESSbot along with ORSY[®]mat, can be summoned from point A to B very easily, together with the digital iDISPLAY and the in-house software solution of Würth Industrie Service. For this, every workstation is equipped with an iDISPLAY that shows the pre-programmed routes that the respective employee can select and request. The coworker is always available in a central warehouse for this. A mobile storage system that can be used wherever it is required. Absolutely flexible!

At the innovation competition titled "Route to Fastener Innovation", the mobile ORSY[®]mat will be presented as a pioneer for material supply to the workstation.

A visit to the booth 620 of Würth Industrie Service in hall 1 at the Fastener Fair Global in Stuttgart is definitely worthwhile!

Brief profile of Würth Industrie Service GmbH & Co. KG

Within the Würth Group, Würth Industrie Service GmbH & Co. KG is responsible for supplying to the industrial sector. Since its foundation in the year 1999, the company is located at Würth Industrial Park in Bad Mergentheim, Germany with over 1,800 employees.

As a one-stop C-Parts provider, the company offers its customers a specialised product range with over 1,400,000 items: from screws and tools to connection and fastening technology, technical chemicals as well as occupational safety solutions. Aside from the extensive standard product range, the strength of the company lies in its customer-specific, logistical and dispositive supply and service concepts as well as special parts. Under the service brand "CPS® - C-Product Service", the company offers modular solutions customised as per the customer's requirements. These consumption-based and demand-based systems streamline the processes for Purchase, Logistics and Quality assurance while enabling the procurement of small parts in a cost-optimised manner. Logistic and dispositive services such as shelving systems that use scanners or a just-in-time supply using Kanban bin systems play a significant role in increasing productivity.
