

## PRESS RELEASE

### **Würth Industrie Service at bauma 2025 – Smart solutions for mining industry and construction machinery**

*Bad Mergentheim/Main-Tauber Kreis.* From climate neutrality, connected and sustainable construction to alternative drive concepts: Important decision-makers will come together to discuss the trends and topics that impact the dynamics of the industry at the 34<sup>th</sup> edition of bauma, the world's leading trade fair for construction machines, building material machines, mining machines, construction vehicles and construction equipment from 7<sup>th</sup> to 13<sup>th</sup> April 2025. Würth Industrie Service GmbH & Co. KG as well as Würth Elektronik ICS GmbH & Co. KG will also participate in the fair in Munich together and showcase their holistic logistics solutions for automated and efficient supply of production materials and auxiliary and operating materials at their joint booth 248 in hall 5.

#### **Because every small part is indispensable**

Screws, nuts and washers – seemingly insignificant and yet extremely valuable: Fasteners have proven to be an important control factor in day-to-day operations for ensuring safe and trouble-free manufacturing. The significance of fasteners in industries like construction, building materials and mining machinery becomes apparent mainly in large machinery such as compact excavators, hydraulic excavators, or rollers. Over 70 percent of the individual components installed in these machines can be sourced from the product range of Würth Industrie Service. Whether it is corrosion-resistant screws, nuts and washers, hydraulic screw connections as well as pipe clamps for the excavator arm, wedge lock washers for the rotating assembly, sheet metal bracket, holder or even connecting rod bolts for the engine – each and every one of these parts is indispensable. It is equally important that the customers in industries like construction, building materials and mining machinery can rely on every part, no matter how small. In addition, C-Parts have a significant impact on procurement due to their irregular requirement, low unit costs and a wide variety of items. As a holistic partner, Würth Industrie Service ensures that C-Parts are always available to its customers exactly where and when they are needed. True to the motto: "Fasteners. With certainty." This in combination with customised procurement and logistics concepts for direct and indirect material as well. They build the basis of smooth supply in the construction machinery industry: They automate replenishment, ensure lean and secure processes in the supply chain, reduce manual work, costs and

transport distances, create ergonomic, precisely coordinated work environments and enable a transparent overview of requirements and consumption. At the joint trade fair booth of Würth Industrie Service and Würth Elektronik at this year's bauma, visitors will be able to explore, experience and try out a range of selected solutions. With a special focus on the RFID Kanban for fully automated replenishment of small parts for production. Besides, the company will present a comprehensive overview of its specialised C-Parts spectrum with more than 1,400,000 items used in industrial production as well as for maintenance and servicing. Visitors will get the opportunity to explore standard parts, norm parts, threadlockers, special and drawing parts as well as auxiliary and operating materials live at the event. Additionally, Würth Industrie Service will show simple and time-saving solutions for repairing damaged thread or thread connections that cannot be outperformed by any other single screw connection in terms of wear resistance, thread friction, surface finish, corrosion and heat resistance.

Würth Industrie Service and Würth Elektronik will present their comprehensive, connected solutions for production and operating materials at the bauma from 7<sup>th</sup> to 13<sup>th</sup> April 2025 in Munich, in hall A5/booth 248.

#### Brief profile of Würth Industrie Service GmbH & Co. KG

Within the Würth Group, Würth Industrie Service GmbH & Co. KG is responsible for supplying to the industrial sector. Since its foundation in the year 1999, the company is located at Würth Industrial Park in Bad Mergentheim, Germany with over 1,800 employees.

As a one-stop C-Parts provider, the company offers its customers a specialised product range with over 1,400,000 items: from screws and tools to connection and fastening technology, technical chemicals as well as occupational safety solutions. Aside from the extensive standard product range, the strength of the company lies in its customer-specific, logistical and dispositive supply and service concepts as well as special parts. Under the service brand "CPS® - C-Product Service", the company offers modular solutions customised as per the customer's requirements. These consumption-based and demand-based systems streamline the processes for Purchase, Logistics and Quality assurance while enabling the procurement of small parts in a cost-optimised manner. Logistic and dispositive services such as shelving systems that use scanners or a just-in-time supply using Kanban bin systems play a significant role in increasing productivity.
